

Device Modules

Omnis Integrated Security Software

Access Control

- Support for IP-based Access Control Hardware.
- Provides easy control of doors or groups of doors.
- Easy implementation of policies.
- Quickly set up user responses to access events using the Omnis Event Manager.
- Any access event (i.e. refused entry, forced entry etc.) allows responses in other systems (text a user, lock doors, start recording etc.)

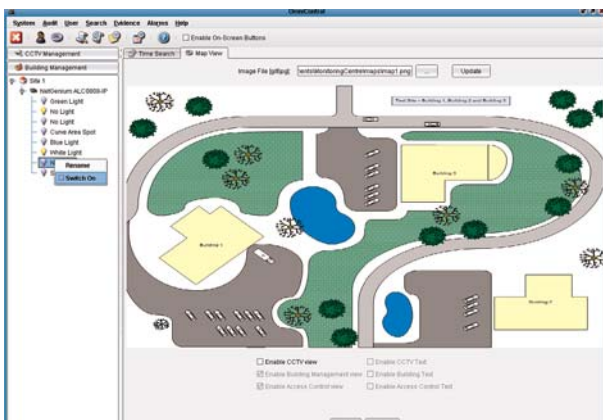

Alarm Panels

- Integration with vendors of major alarm panels.
- Quickly setup responses to alarm conditions using the Omnis Event Management System.
- Provides the ability to set and un-set zones while maintaining link with user privileges.
- Schedule when the alarm panels are active.
- Multiple types of alarm panel in the same system.

Lighting & Building Control

- IP, Network-based Lighting & Building Control.
- Lighting control options are available as responses to system alarms and events.
- Save money & resources by switching off lights and heaters automatically when rooms are unoccupied.

Device Modules

Omnis Integrated Security Software

What are the Device Modules?

The Device Modules provide the interfaces to control and configure third party devices and systems. They can be mixed and matched to meet your specific requirements. The Device Modules are designed to plug into the Omnis Framework to provide a tightly integrated Management, Command and Control System providing an immense degree of flexibility.

The Business Modules can also be added or designed to solve specific operational problems.

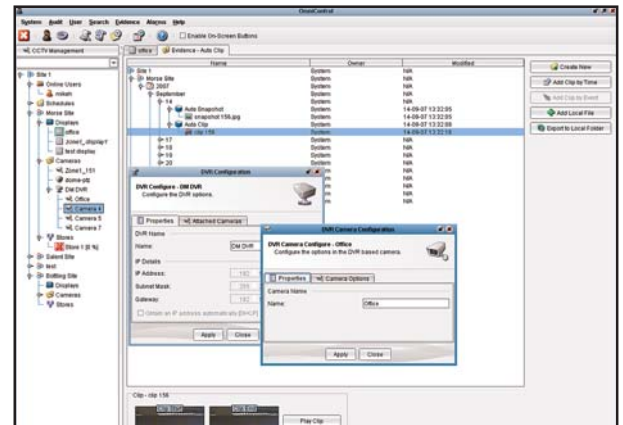

Cameras and Video Servers

- Combine Analogue & Digital IP cameras into a fully integrated, IP network-based system.
- Easy configuration and control of cameras.
- Maximise the cameras capabilities by integrating into the Omnis Event Bus.

Digital Video Recorders (DVRs)

- Allows the integration and control of DVRs from multiple vendors.
- Single user look and feel regardless of hardware manufacturer.
- Retrieve video footage for use as evidence.
- Receive alarms from the DVRs.
- Use the DVR functions as responses to alarm events from other systems.

Video Analytics

Integration of latest analytic devices provides many benefits :-

- Alarms generated are automatically fed into Omnis's powerful event management system.
- Clarity about how and why an alarm has been raised.
- Single user interface to all analytic devices to set and un-set alarm conditions.
- Omnis has been integrated with some of the leading analytic devices and systems.
